

we connect any video conferencing system on any network, from anywhere

Contact us today for a free consultation to discuss how to progress your firm through the Adoption Roadmap.

BENEFITS

Partners

Provide a simple yet secure way to communicate between partners and lawyers for business and case strategy meetings. Offer a face-to-face alternative for a new lawyer recruitment and other employees candidates without travel time and cost.

Lawyers

Increase communication and collaboration with other lawyers and clients while reducing travel cost and time. Increase billable meetings with the ability to conduct more meetings without losing valuable time on the road.

Firms

Increase interaction and collaboration across offices and provide an easy way for expert witnesses, partners and clients to provide official testimony or statements. Reduce third party provider cost such as video recording services, or expert consultations.

IT Directors

Remove the burden on IT staff while achieving a scalable, robust, secure and interoperable video conferencing environment based on service level agreement. Achieve usage levels never experienced before. Support communications needs across the firm.

LAW FIRMS USAGE CASES

SERVICES

Health Check Assessment

LVN Health Check Assessment will provide insight and statistically proven information on the root causes that prevent video conferencing from becoming a key business advantage to your firm.

Our senior consultants will focus on People, Process, Technology and Room Environment to fully understand and share our findings after the assessment is completed.

SERVICES

Cloud-based video conferencing

LVN cloud-based video conferencing provides the complete hosted video infrastructure service with full service quality assurance and the broadest interoperability support available for video applications.

Our 24x7 concierge services operators will pre-test, launch, technically monitor and disconnect calls allow you to fully focus on your meeting and not on technology.

Connect any device, any network, anywhere with LVN cloud-based video conferencing platform.

SERVICES

HARDWARE

LVN partners with several vendors in order to bring the best available hardware based on the needs of your firm.

LVN can sell the entire portfolio of any of the major video conferencing vendors, including break, fix and replacement service contract with engineer on-site if required.

Smart products allow for easy visual and document collaboration.

HARDWARE

VPOD products provide the ideal video conferencing environment that it is quickly deployed, installed and available within days. Avoid the timely and costly room remediation when using VPOD products.

Wolfvision projectors are of great value to document sharing during video conferencing meetings.

HARDWARE

Cyviz products are optimized for auditorium space to accommodate intensive data sharing combined with video conferencing. The Cyviz wall size screen will provide plenty of space allowing for maximum visibility and collaboration.
